Summary

With 4 years of hands-on experience in web development, I specialize in HTML to build the structural backbone of engaging and user-friendly websites. Currently, I'm leveraging my expertise at Bluebit Technology in Surat, where I focus on creating responsive, visually appealing, and highly functional web pages that enhance user interaction and satisfaction.

Expertise in HTML: Mastering the art of crafting well-structured, accessible, and efficient HTML code.

Responsive Design: Skilled in implementing responsive layouts that adapt flawlessly across devices and screen sizes.

Attention to Detail: Dedicated to ensuring pixel-perfect accuracy and adhering to best practices for web standards.

Collaborative Approach: Experienced in working with design and development teams to deliver high-quality, on-time solutions.

Continuous Improvement: Committed to staying current with emerging trends and technologies
